DPP DEFINITIONS

<b>Volume 4, Number 5</b>
<b>Mandatory Release (MAN):</b> A non-discretionary release from prison required by law after a criminal offender has served his or her sentence, less diminution of confinement credits.
<b>Parole (PAR):</b> A discretionary, conditional release from criminal imprisonment granted by the Maryland Parole Commission.
<b>Probation (PRO):</b> A disposition under which a court defers imposition of a sentence or suspends the sentence and releases an individual under prescribed terms and rules for a specified period of time.
<b>Probation Before Judgment (PBJ):</b> A disposition under which a court defers imposition of a verdict but may require compliance with prescribed rules and terms for a specified period of time.
<b><u>SUPERVISION LEVEL:</u></b>
<b>Violence Prevention Unit (VPU):</b> A supervision level for cases assigned to the Violence Prevention Initiative (VPI). VPI represents a strategy for the management of offenders who have been convicted of specified violent offenses and who, on the basis of a screening process, exhibit traits which have been linked through research to an increased potential for violent recidivism. Such individuals are diverted to a containment-based, intensive supervision strategy structured to minimize the threat they might otherwise represent to the community. This strategy involves the close monitoring and strict enforcement of an individual's compliance with all conditions of supervision, and immediate and decisive action in response to any instances of deliberate non-compliance.
<b>Intensive (INT):</b> A supervision level to which cases with a risk assessment score of fifteen or above are assigned. At this level, a significant number of risk factors for recidivism are present which generally require substantial agent activity in the form of informational and motivational interviewing, initiation and monitoring of referrals, and response to non-compliant behavior – specifically through a graduated sanctioning process that leads to greater compliance and more successful outcomes.
<b>Intermediate (IMD):</b> A supervision level to which cases with a risk assessment score above six and below fifteen are assigned. They are either offenders whose initial assessment indicated a lower level of risk to the community, or those whose performance at reassessment reflected successful efforts to address criminogenic factors, thus reducing the risk of recidivism. A change in classification from intensive to intermediate only occurs when it is agreed that the offender's adjustment to supervision merits the change, and that community safety is unlikely to be compromised by the change.
<b>Review (REV):</b> A supervision level to which all probation, parole, and mandatory release cases are initially assigned. A case may remain at this level for a maximum of sixty days, during which time essential records are gathered and reviewed, and a risk level is determined.
<b>Standard (STD):</b> A supervision level to which cases with a risk assessment score of six or lower are assigned. They are, for the most part, low-risk, low-impact, relatively stable offenders requiring minimal intervention on the part of an agent. For a offender classified as standard, an agent must ensure that the offender is instructed to complete all special conditions, to make all court-ordered payments as required, and to inform the agent immediately if he or she intends to change his or her residence or telephone number, or wishes to travel or relocate to another state.
<b><u>CASELOAD TYPE:</u></b>
<b>Drug Court:</b> Drug Treatment Court provides District and Circuit Court judges in Baltimore City with a sentencing option other than incarceration for non-violent, substance-abusing offenders with a history of drug-related criminal episodes. The program is designed to intervene in the criminal lifestyle of participants, with a goal of interrupting the repetitive cycle of arrest-incarceration-release-re-arrest characteristic of these offenders. The approach involves a specialized, treatment-focused form of intensive probation supervision that can involve such modalities as inpatient therapy, intensive outpatient therapy, mandatory urinalysis, acupuncture, education, transitional housing, and "shock" incarceration. Offenders assigned to Drug Court remain in either Intensive or Intermediate level of supervision.
<b>Sex Offender:</b> An individual against whom an incident of sexual misbehavior or criminal behavior with sexual intent has been charged, which has resulted in some form of criminal justice intervention or sanction. For purposes of specialized, containment-model supervision, the Maryland Division of Parole and Probation classifies as sexual offenders individuals under current supervision for a sexual offense, individuals under supervision for a non-sexual offense who are required to register as a sexual offender as a result of a prior offense, and individuals identified during the course of supervision as appropriate for specialized management. Risk assessments are conducted on these offenders using specialized instruments, on the basis of which they are assigned to one of four supervision levels (LV1 through LV4).
<b><u>KIOSK:</u></b>
A project designed to allow low-risk, non-violent offenders to use a kiosk – similar to an ATM machine – as their primary means of contact with a DPP agent. The supervision of lower-risk offenders through automated, less labor-intensive methods enables DPP to focus its resources more intensely on higher-risk offenders. Kiosks are now in operation in Baltimore City, Anne Arundel and Prince George's counties. Offenders assigned to KIOSK reporting may remain in any of the supervision levels.
